## SAFE EQUINE HYDROTHERAPY

The EquiSafe Spa has been designed from the beginning to be as easy and stress free as possible for both operator and horse. This helps to protect your substantial equine investment and ensure that your horse does not panic and suffer an injury.

Starting from scratch with a unique design means that we have some distinct advantages over conventional equine spas.

## FEATURES & BENEFITS

- > Spa can be lowered fast in cast of emergency
- > Quick access and exit, more horses treated per hour
- > Doors do not have to be water-tight
- > Tank can be raised or lowered to height/location of injury
- > Can be raised slowly to introduce the horse gradually for first time treatments
- > Counter balance system ensures quiet operation  
(minimal moving parts, no hydraulics)
- > 2100 litre water capacity with constant circulation and temperature control
- > Can be used with epsom salts to aid theraputic value
- > Inline Chlorine Feeder creates constant chlorine supply  
(to ensure water is safe for both Horse and Spa Operator)
- > Air jets in line with horses legs introduce oxygen to create massaging effect
- > Constructed with all non-corrosive materials.

## SAFE EQUINE HYDROTHERAPY

The EquiSafe Spa provides excellent hydrotherapy treatment for horses while reducing stress and the potential for injury.

The EquiSafe Spa addresses a variety of issues seen with other systems that can potentially lead to a horse becoming frightened and getting injured in the hydrotherapy unit and EquiSafe also makes it safer and simpler for the operators of the unit.

## EQUISAFE SPA QUICK - SAFE - QUIET

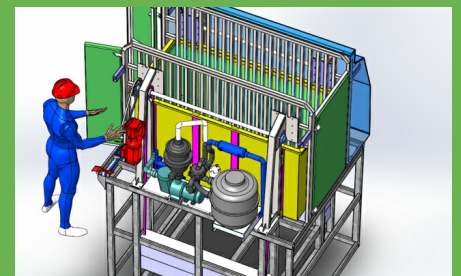

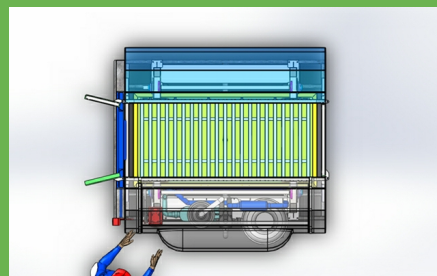

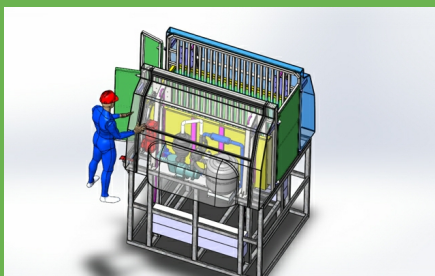

### TECHNICAL SPECIFICATIONS

- > **Materials:** Non-Corrosive (stainless steel, acrylic, PVC)
- > **Water Capacity:** 2100Ltrs
- > **Normal Temperature Range:** Integrated chiller unit allows range of 2-6 degrees
- > **Circulation:** Electric Pump produces constant circulation
- > **Water Cleanliness:** High Specification Filtration Kit and Inline Chlorine Feeder
- > **Tank System:** Sealed tank raised and lowered on quiet counterbalance system
- > **Access:** Non-water-tight doors (doors designed around tank and are not required to seal against water)
